1. Executive summary

Project partners have developed the informational brochures in two target languages – Czech and Slovak - that will be used in recruiting companies for the new professional training scheme and for the network supporting the delivery of training.

The information materials about the project describe, besides the new qualification and training scheme, benefits for employers, craftsmen and on-site workers, as well as the role the network members could play in supporting the new scheme, its operational rules and practicalities.

In addition to the goals and target groups of the project, the brochures give an overview of the current state of professional education in the target countries and explain the choice of professions in the national construction sectors. The basics of the developed training programs, online system of education and the database of CraftEdu courses are also presented in a comprehensive and well-arranged manner.

The final part of the brochures explains e-learning system and principles of certification of the participants of CraftEdu courses.

2. Brochures on the new qualification and training schemes (in Czech and in Slovak)
